

The Journal of **eScience Librarianship (JESLIB)** is an open access, peer-reviewed journal that advances the theory and practice of librarianship with a special focus on services related to data-driven research in the physical, biological, social, and medical sciences, including public health. JESLIB explores the many roles of librarians in supporting eScience and welcomes articles by contributors from all areas of the globe related to education, outreach, collaborations, policy, tools, and best practices. The journal includes peer-reviewed articles discussing topics such as research data management, librarians embedded on research teams, data services, data curation, and data sharing and re-use.
